CRAFT

STAIRCASE FRIENDSHIP BRACELETS

WHAT YOU'LL NEED:

Embroidery floss (as many colors as you'd like!)

Scissors

Tape

INSTRUCTIONS:

1

Cut floss 14-16 inches long and tie a knot with a couple inches above the knot.

3 strands will produce a thinner bracelet. 5 strands will produce a thicker one.

This craft can work in your hair too by wrapping the floss around a very thin braid! (with your parent's permission)

2

Choose 1 strand of floss and make a loop around the other strings.

Pull the strand through the center of the loop you made and guide the new knot towards the knot at the top.

Repeat the process, ensuring your knots are tight and as close to the other knots as possible.

The spiral effect is created by adjusting the knot's location on the strings!
