

SEND A PATIENT TO PULMONARY CAMP

No cost medical specialty camp for young people 8-15.

Pulmonary Diagnoses Include:

- Moderate to Severe Asthma
- Oxygen requirement: continuous or night
- Primary Ciliary Dyskinesia*
- Chest wall abnormalities
- Congenital lung disease
- Bronchiectasis*
- Technology dependence (CPAP, BIPAP, vest, cough assist)
- Interstitial lung disease
- Cystic Fibrosis*

* 1 camper per week with any type of bronchiectasis = CF, PCD, non-CF or PCD bronchiectasis to avoid spread of colonized bacteria

Example Program Adaptations:

Medical staff have an increased awareness of smoke, dust, and chemical particles (like sunscreen and bug spray) that can inhibit breathing. Camp uses gas fire pits to reduce the chance of triggering symptoms, and places purifiers in cabins and any other sleeping locations.
