Example Program Adaptations:

FHF prepares camp for adaptations within activity areas like high ropes (seated harness, haul), boating (adaptive boat launch), and archery (seated shooting position). Camp utilizes all-terrain wheelchairs and a seated water wheelchair system to ensure all campers can participate in activities, and maintains a newly-paved center path that can be used to safely navigate throughout camp. Camp also has the ability to arrange and integrate care needs into activity schedule (flushes, feedings, etc.)

Spinal Cord Camp is July 15-19, 2025
